Disaster as missile explodes

One Saturday morning at exactly 10:17am a missile exploded in Washington D.C, thankfully there was no injuries.

Cloud of black smoke then missile exploded

A man called Walker (a secret agent) put us all in danger when he made the missile explode. This man was fighting a pigeon when he dropped a bomb on a red button which made this missile explode. When this explosion happened cars burst into flames and a big cloud of smoke appeared in the sky. Someone even said that they saw a flying man chasing the missile down!

Sandy Humbergs <sup>LIFE</sup> were one of those who witnessed everything, this is what she had to say. "When I saw this man (Walker) he was feeding a pigeon illegally and then the pigeon got trapped in his suitcase. When this happened I was chased by it."

The Missile

Art - Landscape

This is actually a photo taken by Bailey Zindel of Yosemite Valley in the USA. There had been lots of fires in the area and the valley was filled with thick smoke. You can see the red of the fire in the air.
