

Sophie's River Danube research and literacy work

The River Danube

Length	Sources	Mouth	Continent
2,850km	Brigach + Breg	Danube Delta	Europe Northern Hemisphere

Countries the River Danube flows through
Romania, Germany, Austria, Bulgaria, Slovakia, Hungary,
Moldova, Croatia, Ukraine, Serbia.

Fun	Fact
Did you know, the river Danube flows through the most countries in the world!	
wow!	

The Danube is a major trade route. Countries along the river ship goods from such ports as Belgrade, Serbia; Budapest, Hungary; Vienna, Austria; and Regensburg, Germany. The countries have also agreed to share the water in the river. In several places dams have been built to control the flow of water.

Literacy - Magic Biscuits

Before

A giraffe ate a magic biscuit but not only did it grow (not as much as the dogs did) but it grew an extra head!

After

When Brian fed the biscuits to his dogs, they grew and grew and grew they didn't stop. I think the dogs grew instantly, as soon as a biscuit touched their ~~tongue~~ tongues. Brian gave the biscuit to a giraffe as well, it made it have 2 heads. The creatures have not stopped growing! Brian has to keep the dogs as pets otherwise the dogs will stomp on everything.
